Drive Your Profits Higher and Reduce Inventory Loss with an Electronic Article Surveillance (EAS) System from Checkpoint Systems, a worldwide leader in Shrink Management solutions.

Checkpoint's EAS systems typically pay for themselves in just several month's time, and they have helped all types of retailers reduce shrink by **50-90%!**

What is RF-EAS?

Electronic Article Surveillance (EAS) systems have been proven to protect your merchandise against shoplifters. Small security tags, applied to high-theft items, alert retailers when shoplifters try to take stolen items through electronic sensors at exit doors.

Checkpoint's EAS System is a proven, successful program of shrink reduction management which can protect all of your valuable inventory from theft. Checkpoint's EAS system provides:

- Paper-thin disposable Radio-Frequency (RF) security tags to apply to your merchandise. Tags come in a variety of sizes, and can be pre-printed with text, logo, barcodes, pricing and more.
- A variety of reusable RF hard security tags.
- National Institute for Certification in Engineering Technologies (NICET) certified CCTV/Intrusion/Fire design services
- UL listed Central Station monitoring services
- A wide range of electronic sensors that are placed at the store entrance/exit doors; they sound an alarm when a shoplifter tries to pass stolen merchandise through them.
- Seamless, fast and reliable non-contact scan/deactivation.
- Includes complete system installation and training.
